FREE ACTIVITY SHEET · AGES 8–12

What Is Coding?

Coding means writing clear step-by-step instructions, called code. A computer follows each instruction exactly as written.

A list of instructions that makes a computer do something is called a program.

Try it: be the computer

- Write 5 steps for brushing your teeth.
- Give your list to a friend. They must follow only your words, exactly as written.
- Where did it go wrong? What step was missing?
